MoneyLog — Smart Personal Finance & Subscription Manager

Product Requirements Document (PRD)

---

1. Product Overview

Product Name

MoneyLog

Product Type

Mobile Application (iOS & Android)

Product Vision

MoneyLog is a modern personal finance management app that helps users track expenses, manage multiple accounts, monitor subscriptions, set budgets, and analyze spending behavior through a clean and intuitive mobile experience.

The app combines:

- Expense Tracking
- Income Management
- Multi-Account Management
- Subscription Tracking
- Budget Planning
- Financial Analytics

into one centralized finance platform.

---

2. Problem Statement

Users often:

- Lose track of daily expenses
- Forget subscription renewals
- Use multiple bank accounts and cards
- Lack visibility into monthly spending
- Struggle with budgeting and savings
- Need a simple finance dashboard

Existing finance apps are:

- Too complicated
- Outdated in UI/UX
- Missing subscription management
- Focused only on expense logging

MoneyLog solves this by providing:

- Clean fintech UI
- Fast expense entry
- Account-based transaction tracking
- Subscription visibility
- Smart budgeting experience

---

3. Product Goals

Primary Goals

- Simplify personal finance management
- Track expenses and income efficiently
- Manage multiple financial accounts
- Monitor subscriptions and recurring payments
- Help users control budgets and savings

Business Goals

- Increase daily engagement
- Build scalable fintech ecosystem
- Introduce premium analytics later
- Enable future AI-based financial insights

---

4. Target Audience

Primary Users

- Working professionals
- Freelancers
- Students
- Families
- Digital payment users

User Age Group

18–40 years

---

5. Core Product Features

5.1 Authentication Module

Features

- Email & Password Login
- Google Authentication
- OTP Verification
- Forgot Password
- Secure JWT Authentication

Screens

- Splash Screen
- Onboarding
- Login
- Signup
- Forgot Password

5.2 Dashboard

Purpose

Provide a complete overview of the user’s finances.

Dashboard Components

- Total Balance
- Monthly Income
- Monthly Expenses
- Net Savings
- Cash Flow Summary
- Budget Progress
- Spending Analytics
- Recent Transactions
- Upcoming Bills
- Active Subscriptions

Visual Components

- Summary Cards
- Spending Charts
- Pie Charts
- Progress Bars
- Recent Activity Cards

5.3 Expense Management

Purpose

Allow users to track and manage all expenses.

Features

- Add/Edit/Delete Expense
- Manual Expense Entry
- Category Selection
- Payment Method Selection
- Linked Account Selection
- Merchant/Place Name
- Notes & Tags
- Receipt Upload
- Recurring Expenses
- Expense Filters & Search

Expense Categories

- Food & Dining
- Hotel
- Shopping
- Travel
- Entertainment
- Bills
- Healthcare
- Education
- Transportation
- EMI / Loans
- Others

5.4 Income Management

Purpose

Track all user income sources.

Income Types

- Salary
- Freelance Payments
- Business Income
- Refunds

- Cashback
- Investments
- Other Income

Features

- Add Income
- Income History
- Account-linked Income
- Monthly Income Reports

5.5 Multi-Account Management

Purpose

Enable users to manage multiple financial accounts.

Supported Accounts

- Bank Accounts
- Credit Cards
- Debit Cards
- Cash Wallet
- Digital Wallets

Features

- Add Multiple Accounts
- Account Balance Tracking
- Account-wise Transactions
- Money Transfer Between Accounts
- Credit Card Due Tracking
- Account Analytics

5.6 Account-Linked Transaction System

Purpose

Ensure every transaction is connected to a financial account.

Transaction Types

- Expense
- Income
- Transfer

- Refund
- Subscription Renewal

System Behavior

When a transaction is added:

- Selected account balance updates automatically
- Transaction appears in account history
- Dashboard analytics refresh
- Budget calculations update

5.7 Payment Methods

Supported Payment Methods

- Cash
- UPI
- Credit Card
- Debit Card
- Wallet
- Net Banking
- Bank Transfer

Features

- Payment method tracking
- Default payment methods
- Account-linked payment methods

5.8 Subscription Management

Purpose

Track recurring subscription payments.

Supported Subscriptions

- Netflix
- Spotify
- Amazon Prime
- Dropbox
- Adobe
- Apple Music
- Gym Memberships

- Other Services

Features

- Add Subscription
- Renewal Tracking
- Monthly/Yearly Plans
- Reminder Notifications
- Active/Cancelled Subscriptions
- Subscription Spending Summary

5.9 Budget Management

Features

- Monthly Budget Setup
- Category-wise Budgets
- Budget Progress Tracking
- Overspending Alerts
- Savings Goals

Visual Components

- Progress Bars
- Budget Cards
- Goal Indicators

5.10 Savings Goals

Purpose

Help users save toward financial goals.

Examples

- Emergency Fund
- Vacation
- New Laptop
- Car Purchase

Features

- Goal Creation
- Target Amount
- Current Progress

• Goal Tracking

5.11 Transaction History

Features

• Complete Transaction Timeline
• Search Transactions
• Filter by:
• Category
• Date
• Account
• Payment Method
• Merchant
• Transaction Details

5.12 Reports & Analytics

Reports

• Monthly Spending Reports
• Income vs Expense Reports
• Category-wise Spending
• Subscription Reports
• Budget Reports
• Savings Reports

Visualizations

• Line Charts
• Pie Charts
• Spending Trends
• Budget Indicators

5.13 Notifications & Alerts

Notifications

• Subscription Renewal Reminders
• Budget Exceeded Alerts
• Bill Due Reminders
• Low Balance Warnings

---

6. User Flow

Main Flow

User Registration → Add Accounts → Add Income → Add Expenses → Add Subscriptions → Set Budgets → Analyze Spending → Receive Alerts & Insights

---

7. Mobile Navigation Structure

Bottom Navigation Tabs

1. Home
2. Accounts
3. Add Transaction
4. Budget
5. Profile / More

---

8. UI/UX Requirements

Design Style

- Modern Fintech UI
- Minimal & Clean
- White Background
- Blue Accent Color
- Rounded Cards
- Soft Shadows
- Smooth Animations

UX Goals

- Fast expense entry
- Simple navigation
- Easy readability
- Minimal learning curve

---

9. Technical Requirements

Frontend

- React Native
- Expo

- TypeScript
- React Navigation
- NativeWind / Tailwind CSS

Backend

- Node.js
- Express.js / NestJS

Database

- PostgreSQL

Authentication

- JWT
- OAuth

Notifications

- Firebase Cloud Messaging

Charts

- Victory Native
- react-native-chart-kit

---

10. Suggested Database Structure

Core Tables

- users
- accounts
- transactions
- income
- expense_categories
- subscriptions
- budgets
- savings_goals
- notifications
- payment_methods

---

11. MVP Scope

Included in MVP

- Authentication
- Dashboard
- Expense Tracking
- Income Tracking
- Multiple Accounts
- Transfers
- Payment Methods
- Subscription Tracking
- Budget Management
- Reports & Analytics
- Notifications

Excluded from MVP

- AI Assistant
- OCR Receipt Scanning
- Bank API Integration
- Shared Wallets
- Investment Tracking

---

12. Future Enhancements (Phase 2)

Planned Features

- AI Spending Insights
- Smart Expense Categorization
- OCR Receipt Scanner
- Dark Mode
- PDF/Excel Report Export
- Multi-Currency Support
- Automatic Subscription Detection

---

13. Monetization Strategy

Free Plan

- Basic expense tracking
- Budgeting
- Limited analytics

Premium Plan

- Advanced reports
- Smart insights
- Unlimited accounts
- Export features
- Enhanced analytics

---

14. Success Metrics

KPIs

- Daily Active Users
- Monthly Active Users
- User Retention Rate
- Number of Transactions Logged
- Subscription Tracking Usage
- Premium Conversion Rate

---

15. Estimated Development Timeline

Phase 1 — MVP

Estimated Duration: 4–6 Weeks

Phase 2 — Smart Features

Estimated Duration: 4 Weeks

Phase 3 — AI & Automation

Estimated Duration: 6–8 Weeks

---

16. Competitive Advantage

MoneyLog combines:

- Expense Tracking
- Multi-Account Management
- Subscription Monitoring
- Budget Planning
- Modern Fintech UI

into one lightweight and easy-to-use mobile application.

Unlike traditional finance apps, MoneyLog focuses on:

- Simplicity
- Mobile-first experience
- Fast daily usage
- Subscription visibility
- Clean analytics
